

June 28, 2020 Novel Coronavirus Case in Tochigi Prefecture (Case No. 74)

Active Epidemiological Investigation (Report No. 2)

June 30, 2020

The confirmed results of the active epidemiological investigation of the case of novel coronavirus (Case 74) declared on June 28 in Tochigi Prefecture are as follows. The information announced today is underlined.

【Patient Summary (Case 74)】

1. Age: 20s

2. Sex: Female

3. Area: Nasukarasuyama City

4. Symptoms and progression:

June 27            After cases 67, 68, and 69 were confirmed positive, Utsunomiya City's Public Health Center arranged for the patient to be tested at Utsunomiya City's PCR Testing Center on the basis of having been in close contact with the infected parties.

June 28            Samples taken at the PCR Testing Center. Tested via PCR at the Utsunomiya Hygiene and Environmental Testing Center and confirmed positive. Developed a fever (37°C range), cough, and fatigue after testing.

June 29            Hospitalized at a medical facility in Tochigi Prefecture.

5. Patient Behavior History

• Wore a mask during transportation.

• Went to work at the nightclub CLUB EIGHT from the night of June 22 until the morning of June 24.

• Commuted via her own car or a car sent by the club.

• June 25            Shopped briefly at a supermarket in Tochigi Prefecture while wearing a mask. Stayed at home with an acquaintance afterward.

• June 26            Remained at home and did not go out.

6. People in Close Contact with the Patient

• Four family members who live with the patient (father, mother, older brother, younger brother) and one acquaintance were in close contact with the patient. They were tested via PCR on June 30 and all were confirmed negative.

7. Protocol from now on

- Any new people who are identified as having been in close contact with the patient will be tested via PCR and placed on health observation or asked to refrain from going out.
